Vision Engineering Inc. has been certified for the quality management system ISO 9001:2008.

- Stunning full-HD 1080p/60fps live video image quality
- Effortlessly capture full-HD images direct to USB memory stick (without a PC)
- High quality stand options, built for precision and stability
- Stand-alone, direct to monitor simplicity
Unlock the power of full-HD imaging with the EVO Cam high performance digital microscope...

Full-HD live video imaging (1080p/60fps) brings to life a macroscopic world in stunning detail, with magnification options up to 300x and full auto focus to ensure ultra-sharp imaging at all times. Capture full-HD images at the touch of a button (without a PC).

Effortlessly capture full-HD images direct to USB memory stick (without a PC).

Stunning full-HD 1080p/60fps live video image quality.

High quality stand options, built for precision and stability.

EVO Cam is optimized for quality control, testing, inspection and documentation, simplifying precision magnification tasks allowing you to focus on the details.
Exceptional image quality

Leading specification optical performance makes EVO Cam a supremely powerful imaging solution.

- View whole samples, then zoom into the smallest detail with the 30:1 optical zoom.
- Range of wide-field and precision objective lenses providing zoom magnification options up to 300x. Parfocal and parcentric zoom optics means no re-focusing is required when changing magnification.
- Auto (and manual) focus, with auto control of other camera settings (white balance, exposure, brightness) ensures ultra-sharp, high contrast imaging at all times.
- View more detail in shadows and highlights with Wide Dynamic Range (WDR) and Visual Enhancement (VE) modes. Ideal for high contrast subjects, such as reflective metals.

Exceptional simplicity

Simplicity is at the heart of EVO Cam. Intuitive operation minimizes any training requirement, making EVO Cam ideal for multiple users, such as production environments.

- Simplicity of stand-alone operation (without a PC). Capture full-HD images direct to USB memory stick at the touch of a button.
- Know where you are at all times. An ‘overview’ function allows quick and convenient sample orientation, with on-screen magnification and on/off crosshair display.

High performance optics

A range of objective lens options ensure stunning results for any application, whether for high magnification, high precision detail work, or for manipulation, re-work and assembly tasks requiring an extra-long working distance.

**Precision objective lenses**

Ultra-high resolution and contrast, optimized for precision magnification work with definition excellence. Anti-reflective coating and 2” (52mm) filter thread.

<table>

**Camera specification**

Leading specification optical performance makes EVO Cam a supremely powerful imaging solution.

| Camera zoom | 30x optical; 2x digital |
| Camera resolution | Full-HD 1080p, 1920x1080, 1/2.8” CMOS |
| Frame rate | 60fps |
| Output | HDMI out |
| Saved file type | .bmp |

**Illumination**

- Integral 8-point LED ringlight ensures optimum shadow-free illumination for all applications. Color temperature 5500K.
- Transmitted substage illumination option permits viewing of a wider range of sample types.
Remote control console option

In addition to convenient operation of all main functions, the remote control console option provides additional functionality, including:

- Customizable overlay grid and movable cursors for simple on-screen measurement.
- 3x memory settings (illumination, magnification and focus position), allowing optimised settings to be saved/recalled for individual samples.
- Customized camera gain and iris settings, enabling enhanced control of image brightness and depth of focus.

Measurement

EVO Cam includes simple on-screen measurement capability, with customizable overlay grid and cursors. Requires remote control console option.

- Customizable overlay grid allows quick on-screen sizing.
- Cursor mode overlays two movable horizontal and vertical lines, allowing measurement of X,Y values, with results displayed on-screen.
EVO Cam stand options

**Multi-axis stand**

- Precise and robust, ideal for industrial applications where maximum work space is desired.
- Integrated gas strut provides counter-balanced adjustability, making operation quick and effortless. Switch between tall components and flat samples with ease.
- Available with platform base, or mounted directly to the work surface.

**Ergo stand**

- Small footprint providing exceptional stability for high magnification use.
- Transmitted substage illumination option permits viewing of a wider range of sample types.
- Floating stage option provides sensitive control for accurate inspection of samples; ideal for inspecting fragile samples, or for avoiding contamination by handling.

**Technical details**

**Multi-axis stand dimensions:**

- A = 17.9” (455mm), 7.24” (184mm)*
- B = 26.9” - 32.7” (682mm - 830mm)
- C = 27.2” (691mm) max.
- D = 11.00” (279mm) max.
- E = 17.3” (439mm) max.

* without platform base.

**Ergo stand dimensions:**

- A = 11.00” (280mm)
- B = 16.5” (420mm)
- C = 20.3” (515mm)
- D = 7.56” (192mm) max.
- E = 7.87” (200mm)

Double-arm boom stand

- Designed specifically for applications requiring extended reach, without compromising stability.
- Easy adjustability allows precise positioning and alignment.
- Available with platform base, or with clamp for mounting directly to the work surface.

Articulated arm stand

- Designed for applications requiring extended reach, with ultimate flexibility.
- Multi-point adjustability allows precise positioning and alignment.

Single-arm boom stand

- High stability boom stand, ideal for larger specimens.
- Cost-effective stand option, complete with heavy duty platform base.

Bench stand

- Compact unit with low-profile base and integral transmitted substage illumination.
- Floating stage option provides sensitive control for accurate inspection of samples.

Effortlessly capture full-HD images direct to USB memory stick (without the need for a PC).

Floating stage

A floating stage option for the Ergo stand and Bench stand provides smooth and precise control, ideal for checking uniformity of components, or inspecting fragile or sensitive samples.

Electronics
An exceptionally large field of view and fatigue-free operation makes EVO Cam ideal for electronics PCB inspection. View the whole PCB, then zoom in to check solder joint quality in stunning detail.

Agriculture
Whether viewing the effects of pesticides on plants, or dissecting and analyzing seeds, the image quality and crisp color rendition of EVO Cam provides a powerful and flexible solution for a wide range of tasks.

Medical devices
From stents to catheters, hearing aids to surgical implements, medical device components require 100% inspection to the highest possible standards. View ultra-sharp, high contrast images in microscopic detail, then capture at the touch of a button.

Plastics and rubber
A wide range of plastic and rubber components such as seals, caps and closures, or packaging materials are precision manufactured to tight tolerances, making quality inspection essential. Stunning true color, high contrast imaging makes tasks such as flash removal easy.

Entomology
Photo-documentation of insects can be challenging with traditional microscope cameras. Exceptional image quality, a wide zoom magnification range and crisp color rendition makes EVO Cam the perfect fit for entomologists.

Precision engineering
Precision engineered components cover a very wide range of industries, from aerospace and automotive applications, to watchmaking and general manufacturing. Stunning live video imaging with amazing simplicity makes EVO Cam an invaluable tool to aid any visual inspection task.
Work in complete comfort...

The ergonomic advantage

EVO Cam allows operators to work in complete comfort, liberating users from the restrictive working practices of eyepiece microscopes. No eyepieces need adjusting. The monitor image can immediately be viewed by any user, ensuring a comfortable working position is maintained at all times.

Users benefit from dramatically improved comfort and ease of use; businesses benefit from increased productivity and efficiency, driving quality improvements and reduced costs.

“Good ergonomics is not a ‘nice to have’ feature, but critical to operator performance and productivity”

Lynx EVO eyepiece-less stereo microscope

Part of a range of world-leading ergonomic magnification solutions, Lynx EVO is the latest generation of eyepiece-less stereo microscope from Vision Engineering. Lynx EVO liberates users from restrictive working practices, opening up a world of enhanced efficiency through stunning 3D stereo imaging and unrivaled ergonomic performance.

About us

Vision Engineering has been designing and manufacturing ergonomic microscopes for over 50 years.

With a philosophy of design innovation, Vision Engineering holds world patents for a number of optical techniques which significantly improve microscope ergonomics.

To date, over 300,000 eyepiece-less microscopes have been installed for both industry and life science applications.

ISO 9001:2008

Service and support

Vision Engineering has a network of international offices throughout North and South America, Europe, Asia, Australasia and South Africa, supported by fully trained distributor partners. Full user training, service, and support is available, ensuring the highest levels of customer support is maintained.

Company history

Vision Engineering was founded in 1958 by Rob Freeman, a toolmaker who had previously worked as a race mechanic with the Jaguar Racing Team. While at Jaguar, Rob developed a borescope for inspecting internal race engine parts without the need for disassembly.

Subsequently he formed Vision Engineering as a means of applying his expertise in optics to manufacturing technology.

Over the years Vision Engineering has supplied leading technology inspection and measurement solutions to improve quality and productivity in thousands of the world’s leading companies.
Other solutions...

**Stereo microscopes**

Vision Engineering’s acclaimed eyepiece-less stereo microscopes offer stunning 3D (stereo) imaging combined with unrivaled ergonomics. The patented eyepiece-less designs liberate users from restrictive working practices, opening up a world of enhanced efficiency and productivity.

With more than 50 years’ experience in the design and manufacture of innovative optical solutions, Vision Engineering has the expertise to advise you on the best solution for your application.

[www.visioneng.us/stereo](http://www.visioneng.us/stereo)

**Non-contact measurement**

Measurement applications vary greatly. This is reflected in the wide range of measurement solutions provided by Vision Engineering.

Vision Engineering manufacture a full range of non-contact measuring systems, including ‘workshop’ measuring microscopes, dual optical and video measuring systems, plus the latest ultra-fast ‘field of view’ measurement systems.

Vision Engineering also has a suite of inspection systems and software solutions, designed for simple on-screen dimensioning.

[www.visioneng.us/measurement](http://www.visioneng.us/measurement)

**Digital inspection**

Take advantage of the power of digital imaging with Vision Engineering’s range of digital video inspection systems. High resolution images combined with simple operation make digital inspection a powerful alternative for any task requiring precision magnification.

The range includes handheld digital solutions for inspection on the move, to full-HD digital imaging with real-time video, for instant results.

[www.visioneng.us/digital](http://www.visioneng.us/digital)

**Contract Manufacturing Services**

From product design and design for manufacture, to full production and logistics, Vision Engineering’s Manufacturing Services offer comprehensive contract design and manufacturing solutions, giving you access to the latest technology, as well as a highly experienced team of designers and engineers.

With over 50 years of experience in the design, development and exploitation of hi-tech products and instrumentation, Vision Engineering Manufacturing Services has the capabilities to turn ideas into reality.
