Portable Surface Roughness Tester
SURFTEST SJ-210 Series

This is it! A small, lightweight, and extremely easy to use surface roughness measurement instrument that lets you view surface roughness waveforms right on the color LCD screen.

- Registered design in Japan, China, and the European Union.
- Design registration pending in the United States of America.
The Surftest SJ-210 is a user-friendly surface roughness measurement instrument designed as a handheld tool that can be carried with you and used on-site.

**Easy to use**

2.4-inch color graphic LCD with backlight
The color LCD provides excellent readability and an intuitive display that's easy to negotiate. The LCD also includes a backlight for improved visibility in dark environments.

Simple key layout
The Surftest SJ-210 can be operated easily using the keys on the front of the unit and under the sliding cover.

**Highly functional**

Advanced data storage capabilities
Up to 10 measurement conditions and one measured profile can be stored in the internal memory.

Optional memory card
An optional memory card can be used as an extended memory to store large quantities of measured profiles and conditions.

Password protection
Access to each feature can be password-protected, which prevents unintended operations and allows you to protect your settings.

Multilingual support
The display interface supports 16 languages, which can be freely switched.

Stylus alarm (patent pending in Japan)
An alarm warns you when the cumulative measurement distance exceeds a preset limit.

**Extensive analysis and display features**

Complies with many industry standards

Displays assessed profiles and graphical data
In addition to calculation results, the Surftest SJ-210 can display sectional calculation results and assessed profiles, load curves, and amplitude distribution curves.
Data can be transferred to and from a computer via the high-speed USB interface.

The memory card slot lets you store large amounts of data onto a memory card.

There are many different kinds of drive units and detectors available.

Intuitive display that’s clear, sharp, and legible.

The large LCD provides excellent readability.

The backlight improves visibility in dark environments.

The keys on the front of the unit and under the sliding cover are well-labeled and easy to use.

The user-friendly screen layout and arrow keys provide intuitive operability.

Displayed settings can be changed easily by using the left and right arrow keys.

(Patent pending in Japan.)

Infrequently used keys are hidden under the sliding cover to prevent unintended operations.

Intuitive display that’s clear, sharp, and legible.

The backlight improves visibility in dark environments.

The keys on the front of the unit and under the sliding cover are well-labeled and easy to use.

The user-friendly screen layout and arrow keys provide intuitive operability.

Displayed settings can be changed easily by using the left and right arrow keys.

(Patent pending in Japan.)

Infrequently used keys are hidden under the sliding cover to prevent unintended operations.

The battery charges in one quarter the time of previous Mitutoyo products.

There are many different kinds of drive units and detectors available.

In addition to JIS and ISO, the Surftest SJ-210 also complies with ANSI and VDA standards.

The display interface supports 16 languages.

In addition to JIS and ISO, the Surftest SJ-210 also complies with ANSI and VDA standards.

The display interface supports 16 languages.

The drive unit can be separated from the display unit by using a cable, allowing more flexible measurement. The driver can be separated and reattached in one simple step.

The large LCD provides excellent readability.

In addition to JIS and ISO, the Surftest SJ-210 also complies with ANSI and VDA standards.

The display interface supports 16 languages.

There are many different kinds of drive units and detectors available.

In addition to JIS and ISO, the Surftest SJ-210 also complies with ANSI and VDA standards.

The display interface supports 16 languages.

There are many different kinds of drive units and detectors available.
Many features in a compact body

Extensive display features that assist measurement

- The highly visible 2.4-inch color graphic LCD with backlight lets you see the screen easily even in dark environments.

- Assessed profiles, load curves, and amplitude distribution curves can be displayed in addition to calculation results. Assessed profiles can also be zoomed up and down.

- The display mode can be freely switched between portrait and landscape.

- Calculation results are displayed in large characters.

Advanced data storage capabilities

- Up to 10 measurement conditions can be stored in the internal memory. Conditions can be quickly read according to the workpiece.

- An optional memory card can be used as an extended memory to store large quantities of measured profiles and conditions. *See page 10 for details about the memory card.

</tr>
</tbody>
</table>

- Many interface options:
  • A USB interface is equipped as standard.
  • The Surftest SJ-210 also provides an RS-232C output, Digimatic output, printer output, and footswitch input.

Stylus alarm function

- An alarm warns you when the cumulative measurement distance exceeds a preset limit. This feature can be used to prevent problems that would be caused by worn out styli. Any value can be specified as the limit. (Patent pending in Japan)

Easy setting

- Displayed settings can be easily changed by pressing the left and right arrow keys under the sliding cover. For example, these keys can be used to switch the cut-off value (t) and the number of sampling lengths (N) on the measurement screen. (Patent pending in Japan)

Setting parameters and recalculating results

- The required parameters can be selected from the screen. The sub-menu also lets you specify detailed settings such as the tolerance. After completing measurement, the parameters can be changed and calculation can be executed again* using the new parameters.

- *May not be possible, depending on the measurement conditions.

Advanced features

- The multilingual display interface supports 16 languages, which can be freely switched.

- Access to features can be password-protected.

- A quick-charge, long-life battery is provided.

Mitutoyo
Battery-powered portability scores when making surface roughness measurements on the shop floor.
Capable of performing measurements in any orientation, including vertical and upside-down. Optional accessories, such as a height gage adapter, allow measurements to be performed efficiently in various situations and setups.

"Storing drive unit in Display unit"
"Detaching drive unit from Display unit"

A wide variation in system setup is possible with the detector + drive unit + display unit combination.

Highly functional detectors and drive units

The driver can be separated from the display unit and reattached in one easy step.

Detector supplied as standard

Selectable from the following two items.
- Measuring force: 0.75mN
  - Stylus profile: Tip radius 2μm
    - Tip angle 60°
- Measuring force: 4mN
  - Stylus profile: Tip radius 5μm
    - Tip angle 90°

Optional detectors

A wide range of optional detectors is available, including detectors for small holes, extra small holes, gear tooth surfaces, and deep grooves.

*See page 8 for details about the Detectors.

Drive units

- Standard drive unit
  - Popular standard drive unit

- Transverse tracing drive unit
  - Best suited for measurement of narrow, shrouded workpiece features such as crankshaft, EDM parts, etc.
    (Patent Registered in Japan)

- Retractable drive unit
  - The detector is in the retracted position at rest so it is immune from damage when inserted into a feature whose profile cannot be easily seen, such as a blind hole, etc.

Carrying case

A convenient carrying case is supplied as standard for protecting the instrument in the field.

*Refer to pages 8 to 11 for details of the optional accessories available.

### Measuring speed
- Measuring: 0.01, 0.02, 0.03 in/s (0.25mm/s, 0.5mm/s, 0.75mm/s)
- Returning: 1mm/s

### Evaluation parameters
- Ra, Rc, Ry, Rz, Rq, Rt, Rmax, Rp, Rv, R3z, Rsk, Rku, RPc, Rsm, Rz1max, S, HSC, RzJIS, Rppi, R

### Filters
- Gaussian, 2CR75, PC75

### LCD dimensions
- 1.45 x 1.93” (36.7 x 48.9 mm)

### Display languages
- Japanese, English, German, French, Italian, Spanish, Portuguese, Korean, Traditional Chinese, Simplified Chinese, Czech, Polish, Hungarian, Turkish, Swedish, Dutch

### Measurement conditions
- Measurement conditions / Calculation results / Calculation results for each sampling length / Assessed profile / Bearing area curve / Amplitude distribution curve / Environment setting information

### External I/O
- USB 1/F, Diplomatic Output, Printer Output, RS-232C 1/F, Foot SW 1/F

### Functions
- GO/NG judgment
- Storage function
- Calibration
- Power-saving function
- Power supply
- Size

### Standard accessories
- 12BAA303 Connecting cable
- 178-601 Roughness specimen
- 12BAK699 Carrying case
- 12BAK700 Calibration stage
- 12BAK820 Protective sheets for display
- AC Adapter
- Operation manual
- Quick reference manual
- Warranty

---

*1: Order the SJ-210 printer (No.178-421A, optional accessory) separately.
*2: Standard deviation only can be selected in ANSI. 16% rule cannot be selected in VDA.
*3: Auto-sleep function is invalid when AC adapter is used.
*4: For connecting the calculation display unit and drive unit.

**Optional Accessories: For Drive Unit**

### Drive unit accessories

#### Nosepiece for flat surface

No.12AAA217
*Not available for the transverse tracing drive unit.

#### Nosepiece for cylindrical surface

No.12AAA218
*Not available for the transverse tracing drive unit.

#### V-type adapter

No.12AAE644
*Transverse tracing drive unit type standard accessories.
*Dedicated to the transverse tracing drive unit.

#### Extension rod (50mm)

No.12AAA210
*Not available for the transverse tracing drive unit.

#### Support feet set

No.12AAA216
*Not attachable to the detector side of the transverse tracing drive unit.

#### Magnetic stand adapter

No.12AAA221 (ø8mm)
No.12AAA220 (ø9.5mm)

#### Point-contact adapter

No.12AAE643
*Transverse tracing drive unit type standard accessories.
*Dedicated to the transverse tracing drive unit.

#### Extension cable (1m)

No.12BAA303
*For connecting between calculation display unit and drive unit.

#### Vertical positioning adapter

No.12AAA219
*Not available for the transverse tracing drive unit.

#### Height gage adapter

No.12AAA222 (9/9mm)
No.12AAA233 (1/4 in / 1/2 in)

### Setting attachments

- **Setting attachment: V type for measuring in the cylinder axis direction**
  - No.178-033
    - The V-width is adjustable to the cylinder diameter facilitating axial measurement of a wide range of cylinder diameters.
    - Adjustible range: ø 5 ~ 150mm

- **Setting attachment: Magnetic slider type**
  - No.178-034
    - The magnet attached to the frame bottom surface allows taking hands-free measurement on the wall.

- **Setting attachment: Inside diameter type**
  - No.178-035
    - Greatly facilitates measurement of internal wall surfaces, for example, a cylinder block.
    - Applicable diameter: ø 75 ~ ø 95mm
    - Accessible depth: 30 ~ 135mm

---

*Enhances measurement efficiency by facilitating the measurement setup of multiple workpieces of the same type and of the hard-to-access sections of a workpiece.*
Optional Accessories: For External Equipment

**Printer for SJ-210**

Assessed profiles and calculation results and curves can be printed out by connecting the SJ-210-dedicated printer, which is palm sized 3.7 x 4.9 x 2.7” (W D H: 93 125 70mm) and can run on an internal battery.
- Power supply can be selected. (AC adapter or battery pack)
- Printable items: Measurement conditions, calculation results, assessed profile, bearing area curve (BAC), amplitude distribution curve (ADC), and environment settings.

Unit configuration:
- Printer main unit
- Printer connecting cable
- Printing paper 6-pack
- Battery pack 1 piece
- Exclusive use AC adaptor (with AC power cord) 1 piece

Example of the connection with SJ-210

**Digimatic mini processor DP-1VR**

By connecting this printer to the Surftest SJ-210’s digimatic output, you can print calculation results, perform a variety of statistical analyses, draw a histogram or D chart, and also perform complicated operations for X-R control charts.

SJ-210 □ DP-1VR Connecting cable
1m: No. 936937 Digimatic SPC cable
2m: No. 965014 Digimatic SPC cable

**Memory card**

A memory card for saving 500 measurement conditions, 10,000 measured profiles, 500 display images, text file (measurement conditions, measured profiles, assessed profiles, BAC, ADC)

*Not all memory cards can be recognized. Please use the memory card recommended by Mitutoyo.*

No. 12AAL069

Printer for SJ-210 supplies:
- Printing paper (5-pack) No. 12AAA876
Optional Accessories: For External Output

**Simplified communication program for SURFTEST SJ series**

The Surftest SJ-210 has a USB interface, enabling data to be transferred to spreadsheet or other software. We also provide a program that lets you create inspection record tables using a Microsoft Excel* macro.

![Simplified communication program for SURFTEST SJ series](image)

**Required environment**:  

*Windows OS and Microsoft Excel are products of Microsoft Corporation.

**The optional USB cable is also required.**  
- USB cable for SJ-210 series (2m)  
  No. 12AAJ088

This program can be downloaded for free from the Mitutoyo website.  
[http://www.mitutoyo.co.jp](http://www.mitutoyo.co.jp)

**Footswitch**

A footswitch is used to trigger measurement. This tool is very useful in cases where you need to measure the same workpiece multiple times using jigs and other fixtures.

![Footswitch](image)  
No. 12AAJ088

**Input Tool: Calculation results input unit**

Surftest SJ-210 calculation results can be loaded directly into commercial spreadsheet software via this unit simply by connecting it to the USB connector on a computer or a PS/2 type keyboard connector. (See Catalog No. E4250-264 for details.)

![Input Tool: Calculation results input unit](image)  
USB keyboard signal conversion model  
IT-012U No. 264-012-10  
PS/2 keyboard signal conversion model
